COPENHAGEN
A game by
Daniel Skjold Pedersen
& Asger Harding Granerud
for 2-4 players of 8 years and up.

Components

• 1 Scoring track   **1 Harbor**

• 4 Scoring markers *(1 per player colour: dark-red, -blue, -yellow, -green)*

• 70 Facade cards   **1 End of Game card**

14x green, blue, yellow, red, & purple

End of
Game card

Reverse
side

Note: The colors of the cards correspond to the colors of the facade tiles.

• 4 Houses *(1 per player colour (dark-red, -blue, -yellow, -green))*

Note: The colors of the houses do not correspond to the colors of the facade cards or the facade tiles.

• 62 Facade tiles (double-sided) – *10 each of blue, yellow, red, green, and purple plus 12 white special tiles*

Number x squares

3x 2:

3x 3:

3x 4:

1x 5:

12x 1 (Special tiles):

• 20 Ability tiles – *5 types x 4 tiles*

Front sides (active side)

Any cards | Additional card | Construction discount | Change of colors | Both Actions

Reverse sides
(inactive)

• 1 Rules booklet

Object of the Game

„Nyhavn" (New Harbor) is famous for its houses with colorful gables built along the waterside. The players face the challenge of constructing new facades in a way that fits perfectly in with this picturesque harbor scenery.

The goal of the game is to be the first player to score 12 or more points, or to have the most points when the End of Game card is revealed.

Players will collect cards of different colors from the display, which they can use to purchase facade tiles of the same color in different shapes and sizes.

Players will use these tiles to construct the facade of their house little by little. Each time a floor (row) is completed they will score 1 point, and 2 points for finishing a section of the house (column). However, these points are doubled if the row or column is made entirely of windows.

When players cover one of the coats of arms, or finish a floor with a coat of arms, they will gain a special ability which will help them reach their goal faster.

Game Set-up

1. Place the **harbor** and the **scoring track** in the center of the playing area, as shown in the illustration.

2. Stack the **facade tiles** by color and shape within reach of all players.

> 👥/👥 *In a game with 2 or 3 players,* return the following tiles to the game box:
>
> 👥
> *1 each of size 2   and   size 4*
>
> 👥
> *1 each of size 2,   size 3   size 4*
3. Shuffle the **facade cards** and stack them face down on the harbor. This is the card supply.

> 👥 *In a game with 3 players,* remove 2 cards of each color (10 total) *before shuffling and return those cards to the game box.*

Then, fill the card display by turning over the top 7 cards and placing them *(in clockwise order)* next to the 7 footbridges. This is the card display.

Place the **End of Game** card face up next to the scoring track.

> 👥 *In a game with 2 players,* shuffle the End of Game card in with the top 9 *cards from the supply and place them face down on the bottom of the card supply.*

4. Each player chooses a **player color** and takes the **house** and **scoring marker** of that color. Players place their house in front of them and their scoring marker on the starting space of their color on the scoring track.
5. Take 1 of each type of **ability tile** per player, stacking them *(seperated by type)* next to the scoring track. Return any remaining tiles to the game box.

Each player takes one of the "**Any cards**" ability tile *(pictured right)* and places it next to their house.

End of Game card

Card supply

Column

Coat of arms (4x)

Construction grid:
Consisting of 45
spaces:
*9 rows **and***
*5 columns*

Coat of arms
row (3x)

Row

Red facade card

Depicts the 4 available facade tiles of this color (red in this case).

> **!!!** *Important: The colors of the facade cards and player colors. Each player may choose from all*
Example of partially constructed facade during the game:

Red facade tile (5 squares)

Each facade tiles has 3 features:

• Shape
• Color
• Number of squares (size)

Brickwork square

Window square

facade tiles do not correspond to the chosen colors when constructing their facade.

Game Play

Start of the game

Beginning with the **first player** *(we recommend the oldest player goes first)*, and continuing clockwise, each player draws their starting hand from the card supply. Draw the following number of cards depending on the number of players:

	Initial starting hand			
	1st Player	*Player 2*	*Player 3*	*Player 4*
Two players	2	3		
Three players	2	3	3	
Four players	2	3	3	4

The active player *(starting with the first player)* chooses one of two possible actions, then performs their chosen action:

A) Take cards   OR   **B) Construct facade**

After taking an action, play passes clockwise to the next player. The game ends immediately as soon as **a player scores 12 or more points or** the **End of Game card** is revealed.

A) Take cards

The player takes 2 adjacent cards from the display and adds them to their hand. It's not permitted to only take one card.

These two exterior cards are not adjacent!

Then, the player refills the display with cards from the supply.
Example: The player takes the two adjacent purple cards, and adds them to their hand.

Maximum Hand Size

Players have a maximum hand size of 7 cards after they have drawn cards.

If drawing cards puts them over the 7 card limit, they must immediately discard down to 7 cards.

End of Game card

When the card supply is exhausted for the first time, shuffle the discard pile and use it as new card supply. Then, shuffle the End of Game card in with the top 9 cards from the supply and place them face down on the bottom of the card supply.

👥 *Skip this step in a game with 2 players.*
The game ends after the card supply is used once only.

B) Construct facade

The player exchanges cards from their hand for a facade tile and attaches it to their house. They then gain points for any rows or columns completed this turn.

1. Pick a facade tile

The active player discards cards from their hand in exchange for a facade tile, following two rules:

1. The number of cards must match the number of squares (windows and brickwork) of the chosen facade tile.

2. All discarded cards must be of the same color as the chosen facade tile.

If the player meets these two requirements, they take the chosen facade tile. A player can only ever take **one facade tile** on their turn.

3 red cards for one red tile size 3

Exception:

If a player places a facade tile such that **at least one of the squares is touching** a previously placed piece of the same color, they may discard one fewer card than normal.

A tile is considered placed adjacent to another tile if at least one square of that tile is adjacent to one square of the existing tile.

Adjacent to the same color:

Not adjacent to the same color:

Example: The green tile is placed adjacent to another green tile of this house, so the player must discard only 2 instead of 3 cards.

Example: The green tile is placed not adjacent to another green tile of this house, so the player must discard 3 cards.

2. Placing a Facade Tile (Construction Rules)

The player must place the facade tile immediately, obeying the following **construction rules**:

1. Before placing the tile, it may be rotated in any way; however, it must fit on the construction grid.

2. A tile must be placed on the bottom row, or such that at least one square is directly above a previously placed tile. Only one square is needed to be above the tile *(see the examples below).*

A

This tile is placed in the bottom row.

B

This tile is placed above another tile.

C

This tile is placed in the bottom row and above another tile.

D

This tile is placed neither above another tile nor in the bottom row.

E

This tile is placed adjacent to another tile, but not above.

Coat of arms actions

After placing the tile, the player performs **one of the three** special actions for each coat of arms covered or row marked with a coat of arms completed:

1. **Special tiles** – The player takes one special tile, placing it immediately according to the construction rules. These tiles are like all other tiles, except they can only be acquired as a special action. If the placed tile covers a coat of arms, or completes a coat of arms row, they may take an additional special actions as normal.

Example: The player places the special tile at the gap of the bottom row, thus completing that row.

OR

2. **Take an ability tile** – The player takes one ability tile from the supply and places it in front of them, active side up. No player may have the same ability tile twice.

Players may use their active special ability tiles at any time on their turn in order to take the depicted action. Once used, that ability tile is flipped to its inactive side. The tiles are explained in detail on *page 6* of this rules booklet.

Active side (unused): *Inactive side (used):*

OR

3. **Activate ability tiles** – The player flips **all** their used (inactive) ability tiles back to their front (active) side. They may use these tiles again on future turns.

3. Score points

If a player completes one or more rows or columns of their house during their turn, they score points for each as follows:

Row:

1 point *if the row contains* **windows and brickwork**, *or just* **brickwork**.

2 points *if the row is made up of* **windows** *only*.

Column:

2 points *if the column contains* **windows and brickwork**, *or just* **brickwork**.

4 points *if the column is made up of* **windows** *only*.

The player advances their scoring marker on the scoring track accordingly.

Rows

1 point

2 points

Columns

2 points

4 points

Ending the Game

The game ends **immediately** as soon as a player scores **12 or more points** or the **End of Game card** is revealed:

• If a player scores 12 or more points, that player is the winner of the game!

• However, if the End of Game card is revealed, the player with the most points at this time is the winner of the game.

In case of a tie for the most points, the tied player whose house has the fewest empty spaces is the winner. If the tie persists, the tied players share the victory.

Ability Tiles

The ability tiles provide special actions that can be used in combination with the actions **A) Take cards** and **B) Construct facade** . Players may use as many of their active ability tiles during their turn as they would like. Used ability tiles are flipped from their active side to their inactive side. By performing a coat of arms action *(see page 5)*, a player may flip all their inactive tiles back to their active sides.

The special actions of ability tiles:

Any cards

When performing the action **A) Take cards** , the player may take two cards from any two footbridges.

Example:
The player takes two cards that are not adjacent.

Additional card

When performing the action **A) Take cards** , the player may take an additional third card from any footbridge.

Example:
The player takes a third card that was not adjacent to the other two.

Construction discount

When performing the action **B) Construct facade** , the player may discard one fewer card in exchange for a facade tile.

Note: When a player builds a facade tile of size 2 adjacent to a tile of the same color and uses this ability tile, he does not have to discard any cards to take the tile.

Example: The player has discarded only two cards for a size three tile.

Example: The player may discard two cards fewer – one fewer because the tile is placed adjacent to an existing tile of the same color, and another fewer because of using the ability tile "Construction discount."

Change of colors

When performing the action **B) Construct facade** , the player may treat their cards of one color as if they were one other color.

1ˢᵗ case:

2ⁿᵈ case:

Example: The player may change all their blue cards to cards of any one other color (green, red, yellow or purple).

Example: The player may change their 4 green cards and 1 purple card to either 5 green or 5 purple cards.

Both Actions

Both Actions – Instead of having to choose between the two actions ("*A) Take cards*" or "*B) Construct facade*") **the player may use this tile** to perform **both actions** during their turn once only. First, they perform the action **A) Take cards** , followed by the action **B) Construct facade** . The player refills the card display only at the end of their turn *(after the action "B) Construct facade")*.

Note: If the player has more than 7 cards in their hand after the action "A) Take cards", they must discard any surplus cards first before proceeding with the action "B) Construct facade".
