

COPENHAGEN

NYHAVN

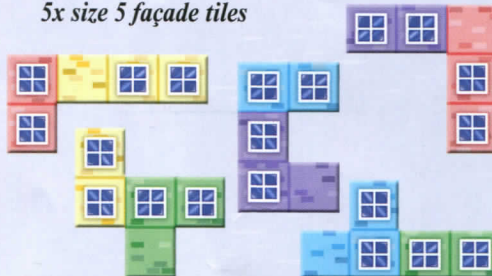

This Queenie adds tiles with unique shapes and more than one colour, providing players with new challenges in building their façades.

Components

5x size 3 façade tiles

5x size 5 façade tiles

Changes during set-up

The following changes are made regardless of player count:

The size 5 multicolour façade tiles replace all size 5 façade tiles from the base game,

which may be returned to the box.

The size 3 multicolour façade tiles are used in addition to the normal tiles required for the player count.

Changes during game play

In order to take a multicolour façade tile when performing the action **B) Construct façade**, a player must discard cards, following this rule: For each square of the chosen tile, the player must discard a card from their hand matching the square's colour.

The player may discard one fewer card, if at least one of the squares is touching a previously placed square of a tile of the same colour. It does not matter how many squares match in colour, the player may discard at most one fewer card.

Example: The size 5 façade tile is touching a red and a yellow façade tile. Only 4 cards have to be discarded. The player decides to keep one yellow cards in his hand.
