

# ECLIPSE

NEW DAWN FOR THE GALAXY

RULES

  
lautapelit.fi

The galaxy has been a peaceful place for many years. After the ruthless Terran–Hegemony War (30.027–33.364), much effort has been employed by all major spacefaring species to prevent the terrifying events from repeating themselves. The Galactic Council was formed to enforce precious peace and it has taken many courageous efforts to prevent the escalation of malicious acts.

Nevertheless, tension and discord are growing among the seven major species and in the Council itself. Old alliances are shattering and hasty diplomatic treaties are made in secrecy. A confrontation of the superpowers seems inevitable – only the outcome of the galactic conflict remains to be seen. Which faction will emerge victorious and lead the galaxy under its rule?

The shadows of the great civilizations are about to eclipse the galaxy. Lead your people to victory!

#### Extra Special Thank You for your help

Antti Autio, Petri Savola, Atte Moilanen, Stefan Engblom

#### Thank You for playtests and advice

Antti Mentula, Jouni Heinänen, Olli-Pekka Vaija, Eero Puurunen, Sally Londesborough, Otto Kataja, Tiina Merikoski, Albert Kaikkonen, Matleena Muhonen, Iina Valkeisenmäki, Teemu Salohalme, Susanna Louhesto, Johanna Louhesto, Mikko Karvonen, Reko Nokkanen, Ilari Tahkokallio, Anttoni Huhtala, Arto Klami, Veli-Matti Jaakkola, Tuomas, Jani Koistiola, Juha Linnanen, Antti Koskinen, Antti Tahvanainen, Mika Lemström, Jussi Kurki, Ossi Lehtinen, Paul Laane, Aarne Ekström, Ilkka Salminen, Valtteri Arvaja, Tero Särkijärvi, Atte Tamminen, Mikko Saari, Ville Saari, Hannu Sinisalo, Sonja Tolvanen, Kalle Malmioja, Aleksi Siirtola, Atte Moilanen, Matias Viitasalo, Atro Kajaste, Antti Muhonen, Timo Ollikainen, Kimmo Leivo, Aleksi Ahtiainen, Oskari Westerholm, Juuso Mattila, Heikki Hyhkö, Olli Sandberg, Michael Xuereb, Chris Rudram, Deryk Sinotte, Gregor MacDougall, Dustin Boggs, Tony Vickery, Josh Aitken, Juuso Takalainen, Bjarne Boström, Antti, Stefan Wahoff, Sören Paukstadt, Ronny Vorbrodt, Alexis D and everyone else who played the game in conventions and game clubs. Also a big Thank You to everyone on the BoardGameGeek for your interest and support!

Game rules and hexes use elements of images created by ESA/Hubble and released with their kind permission. ECLIPSE typeface is based on *Franchise* by Derek Weathersbee.

A game of Eclipse places you in control of a vast interstellar civilization, competing for success with its rivals.

On each game round you expand your civilization by exploring and colonizing new areas, researching technologies and building spaceships to wage war with. The game ends after 9 rounds, and the player with most **Victory Points** wins. Victory Points are gained from controlling galactic sectors, fighting battles, forming diplomatic relations, researching technologies, making discoveries and controlling Monoliths.

There are many potential paths to victory, so you need to plan your strategy according to the strengths and weaknesses of your species while paying attention to the other civilizations' endeavors!

## GAME COMPONENTS

**PLAYER MATERIALS** In 6 player colors (blue, red, green, yellow, black, white), one color for each player: 14 plastic spaceship miniatures (8 Interceptors, 4 Cruisers, 2 Dreadnoughts), 4 Starbase Tiles, 33 Population Cubes, 16 Influence Discs, 3 Ambassador Tiles

**HEXES** 37 Sector hexes: 8 Inner hexes (numbered 101–108), 11 Middle hexes (#201–211), 18 Outer hexes (#301–318); 1 Galactic Center hex (#001), 6 Starting Sector hexes (#221–232)

**BOARDS** 6 Player Boards (two-sided), 1 Supply Board

**TILES** 96 Technology Tiles (24 different), 154 Ship Part Tiles (18 different), 21 Discovery Tiles, 22 Colony Ship Tiles, 21 Ancient Ship Tiles, 1 Galactic Center Defense System Tile, 32 Reputation Tiles, 27 Orbital / Monolith Tiles, 2 Crowded Hex Tiles, 6 Summary Cards, 1 Traitor Card, 4 Info Cards

**MISCELLANEOUS** 18 6-sided dice (8 yellow, 6 orange, 4 red), 18 Storage marker octagons (6 each in orange, pink and brown), 12 purple Damage Cubes, 1 Starting Player Marker, 1 Round Marker, 2 cloth bags (for Technology Tiles and Reputation Tiles)

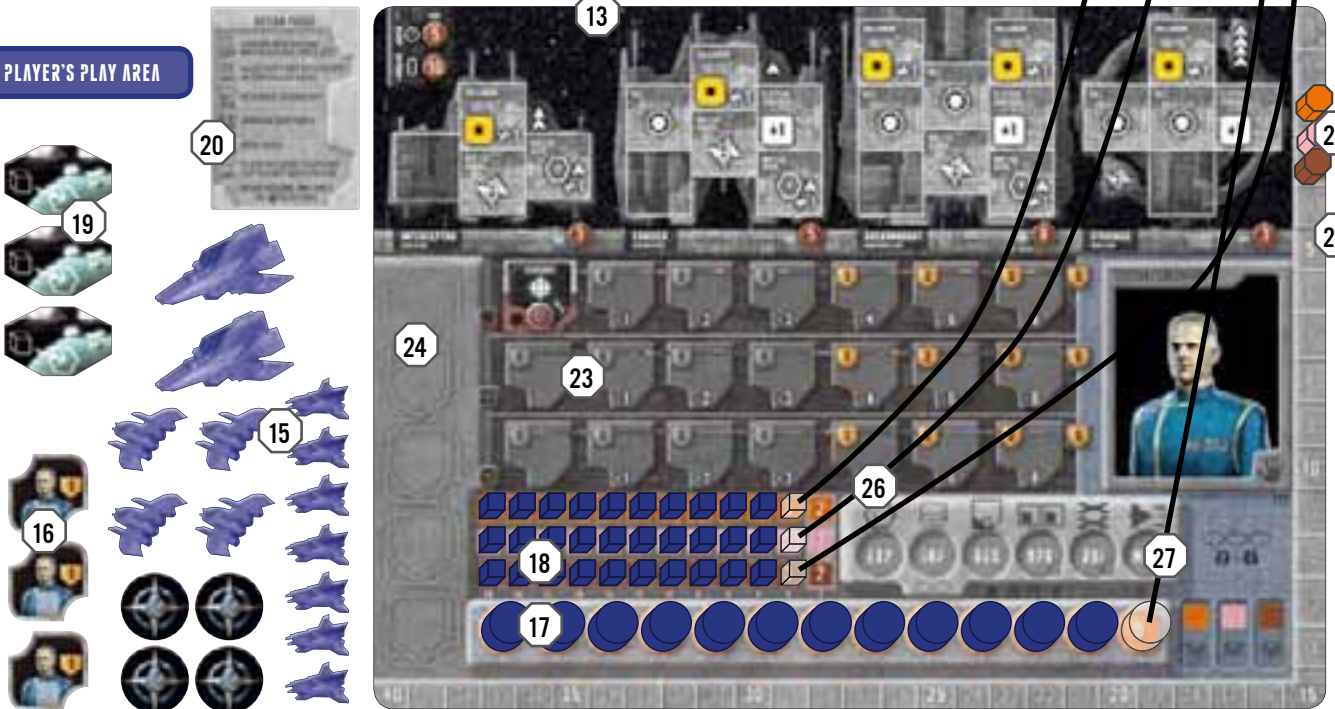

The punch sheets also contain some blank tiles (4 Ambassadors, 1 Technology, 1 Discovery, 1 Reputation and 6 Structures). These are not needed in the game.

**PREPARATIONS**

- [1] Ship Part Tiles [2] Round Marker [3] Supply Board [4] Research track [5] Discovery Tiles
- [6] Ancient Ship Tiles [7] Orbital and Monolith Tiles [8] Damage Cubes [9] Traitor Card
- [10] Galactic Center hex [11] Galactic Center Defense System Tile [12] Sector hex stacks
- [13] Player Board [14] Player starting hex [15] Ships [16] Ambassador Tiles [17] Influence Discs
- [18] Population Cubes [19] Colony Ships [20] Summary Card [21] Storage Markers [22] Storage Track
- [23] Technology Track [24] Reputation Track [25] Interceptor

**BLUE PLAYER'S PLAY AREA**

**TECH TILES**  
 2 players: 12  
 3 players: 14  
 4 players: 16  
 5 players: 18  
 6 players: 20

**OUTER SECTORS**  
 2 players: 5  
 3 players: 10  
 4 players: 14  
 5 players: 16  
 6 players: 18

**EXTRA DISCS?**  
 Note that you have three extra discs that are only used if you Research the Advanced Robotics or Quantum Grid Technologies.

Set the **Ship Part Tiles** [1] and the **Round Marker** [2] on the **Supply Board** [3]. Put the **Technology Tiles** in the bag and shuffle them. Draw random Technology Tiles (according to the number of players) from the bag and set them on their spots [4] on the Research Tracks. Set similar tiles on top of each other. Put the **Reputation Tiles** in another bag and shuffle them. Shuffle the **Discovery Tiles** [5] and set them face down on their spot on the Supply Board. Set the **Ancient Ship Tiles** [6], **Orbital** and **Monolith** [7] Tiles, **Damage Cubes** [8] and the **Traitor Card** [9] likewise on the Supply Board.

Set the **Galactic Center** [10] hex in the middle of the table. Place a Discovery Tile face down on the Galactic Center hex and the **Galactic Center Defense System Tile** [11] on top of it. Place the Sector hex tiles face down in three stacks, **Inner (I)**, **Middle (II)** and **Outer (III)** sector hexes (according to the number of players) in separate stacks [12]. Give the **Starting Player Marker** to the player who has spent the least time on planet Terra, in the Sol system.

Beginning from the starting player and moving clockwise, each player chooses a starting hex and the accompanying **Player Board** [13]. He then places his **Starting Sector hex** [14] in one of the six starting spots in the Middle sector area (two hexes away from the Center hex; the illustration on left shows a three player setup). Place your hex in the starting spot closest to you. Put the rest of the starting hexes and boards back in the box – they are not used in the game.

- Each player takes the following and puts them next to his board:
- all **Ships, Ambassador Tiles, discs and cubes** [15, 16, 17, 18] of one color
  - 3 **Colony Ship Tiles** [19]
  - a **Summary Card**, Action Phase overview side up [20]

- Each player places on his Player Board:
- **one Influence Disc** on each circle of the Influence Track [17]
  - **one Population Cube** on each square of the three Population Tracks (Money, Science and Materials) [18]; the rightmost square on each track (marked with a lighter background) is left empty.
  - **one Storage marker** of each color [21] on his Storage Track [22]: Money marker at "2", Science marker at "3" and Materials at "3"

- Each player then moves onto his starting hex:
- **one Interceptor Ship** miniature [25]
  - **one Population Cube** on each of the Population Squares (**not** on the Advanced squares, marked with a star), taken from the corresponding Population Track [26]
  - **one Influence Disc** on the Influence circle, taken from his Influence Track [27]

**ALIEN SPECIES** These rules apply for the Terran species and are written from their point of view. It is recommended that you play your first game using just them, and add the alien species in the next game. They mostly follow the same rules, but each has some slight differences, such as different starting Resources, number of Ships you may move with the Move action, etc. Please refer to pages 26–27 for the differences of each species.

If you decide to play with the alien species, players choose the species they play with. Beginning with the player on the right side of the starting player and moving counterclockwise, each player chooses a species and places the starting hex. Note that if you choose Terrans, you also effectively choose one alien species out of the game.

**POPULATION CUBES** Your civilization's population is represented by the small wooden **Population Cubes** in your player colour. When your civilization expands to a new sector, it may be colonized by moving the Population Cubes on your Player Board to the squares on the sector hex. The more cubes you move to the hexes, the more Resources (Money, Science, Materials) you produce. The left-most visible square on each Population Track shows how many units you will produce in each round (in the picture above, 12 Money, 21 Science, 15 Materials).

**RESOURCES** Your hexes produce three kinds of Resources: Money, Science and Materials.

- Money** is needed for using Influence: controlling hexes and taking actions requires that you pay Money at the end of the round.
- Science** is needed for Research: researching new Technologies requires that you pay Science.
- Materials** are needed for Building: building new Ships and Structures requires that you pay Materials.

The amount of each Resource you have is marked with a Storage Marker on the Storage Track.

**INFLUENCE DISCS** Your civilization's influence is represented by the wooden **Influence Discs** in your player colour. Influence Discs are used to mark the hexes your civilization controls. Also, taking an action requires you to move an Influence Disc on the corresponding action space. The leftmost visible circle on the Influence Track shows how much Money you have to pay at the end of the round to keep your civilization functioning (in the picture above, 2 Money). Thus, the more hexes you control and more actions you take, the more Money you need to pay.

**COMPONENT LIMITATIONS** There is a limited amount of Ships, Population Cubes, Influence Discs, Technology Tiles, Discovery Tiles, Reputation Tiles and Ambassador Tiles. If they run out, they run out. Ship Part Tiles and Damage Cubes are unlimited, so in the unlikely case they run out, use a substitute.

**TECHNOLOGY** Researching Technologies gives your civilization advantages. Some Technologies are required for upgrading certain parts of your Ships or building new Ships and Structures, while others make your civilization more efficient (e.g. increasing your production or giving you more Influence Discs). The Technologies are divided in three categories: **Military**, **Grid** and **Nano Technologies**. Researching a Technology in a category gives you discount in further research of that category. Researched Technologies are placed on your Player Board.

**SHIPS** Ships are used for fighting against other players and the non-player Ancients, as well as occasional exploring. There are four kinds of Ships:

- **Interceptors**; 8 available for each player
- **Cruisers**; 4 available
- **Dreadnoughts**; 2 available
- **Starbases**; 4 available

Bigger Ships cost more to build but have more space for Ship Parts. Starbases are immobile.

**SHIP PARTS** Each kind of Ship has its own blueprint on your Player Board. Players can customize their Ships during the game: the Ship Parts (pre-printed or gained with the Upgrade action) on the blueprint give the Ship its abilities. There are several different types of parts:

- **Cannons** are used on each combat round to attack enemy Ships. Different Cannons make different amounts of damage: each star ★ is one point of damage.
- **Missiles** are like Cannons, but used only in the beginning of the combat.
- **Hull** absorbs damage. Hull's ability to absorb damage is marked with stars: each Hull symbol ★ absorbs one point of damage.
- **Computers** make weapons hit more easily, and also give more Initiative.
- **Shields** make your Ship more difficult to hit.
- **Drives** make Ships move further with one move, and also give the Ships more Initiative.
- **Energy Sources** produce Energy for other Ship Parts.

Some Ship blueprints have extra Ship Parts outside the Ship Part grid. These work just like the other Ship Parts, except that they cannot be replaced.

**STRUCTURES** Structures are colossal objects built on your controlled hexes. **Orbitals** provide your population a place to live in: each Orbital can hold a single Population Cube. **Monoliths** give you points at the end of the game. Structures are permanent objects which stay on the hex until the end of the game.

**DISCOVERY TILES** Some hexes contain a Discovery Tile which is awarded to you when you first take control of the hex by placing an Influence Disc there. Each Discovery tile is double sided: the face side has a benefit (extra Resources, new Technologies, Ancient Ship Parts..) and the back side has a 2 Victory Point value. When receiving a tile, you must immediately decide which side you use. The Discovery Tile benefits are:

**3x +8 Money, 3x +5 Science, 3x +6 Materials:** move your Storage marker and discard the tile.

**3x Ancient Technology:** you may take the cheapest Technology Tile you don't already have from the Supply Board and place it on your Player Board for free. Discard the Discovery Tile.

**3x Ancient Cruiser:** place one of your unused Cruisers in the hex and discard the tile.

**6x Ancient Ship Part:** you may place this part in any of your Ships (returning an existing part if needed); you may also keep the part next to your board and place it later with the Upgrade action; if you later want to replace an Ancient Ship Part, it is discarded.

Discovery Tiles kept as Victory Points are placed next to your Player Board back side up until the end of the game.

**REPUTATION TILES** You receive Reputation Tiles from combat. They are worth Victory Points at the end of the game.

**AMBASSADOR TILES** You can use your Ambassadors to form Diplomatic relations with other players. They increase your production and are worth Victory Points at the end of the game.

**TRADE** At any time, you may convert 2 units of one Resource (Money, Science or Materials) to 1 unit of any other.

**CROWDED HEX TILE** In the occasion you cannot fit all Ship miniatures in a hex, you may place them somewhere else on the table and mark the hex with a Crowded Hex Tile.

**WORMHOLES** Due to the galactical distances, star ships in Eclipse may move only using the wormhole network. Also, exploring the galaxy is possible only through a wormhole.

**HEXES** The game board is built from hexagonal tiles ("hexes") during the game. Each hex represents a sector of star systems and may contain a number of colored Population Squares which represent star clusters with worlds producing Resources.

Each sector (Inner, Middle and Outer) has its own hex stack. In the beginning of the game, only the Center hex and players' start sectors are placed on the table. The rest are placed during the game. The Inner and Middle sectors are laid out in concentric circles around the Center hex. Outer sectors may branch freely outwards.

Inner sectors are numbered 101–108, Middle sectors 201–211, Outer sectors 301–318, Starting sectors 221–232 and the Galactic Center is 001.

**CONTENTS OF A HEX**

- [1] Influence circle
- [2] Victory Point value
- [3] Wormhole
- [4] Artifact
- [5] Population Square / Money
- [6] Population Square / Advanced Money
- [7] Population Square / Science
- [8] Population Square / Advanced Science
- [9] Population Square / Materials
- [10] Hex number

## GAME ROUND

The game round consists of these four phases:

- ACTION PHASE** Players take actions clockwise, one action at a time
- COMBAT PHASE** Battles are resolved and sectors conquered
- UPKEEP PHASE** Civilization Upkeep costs are paid and Resources produced
- CLEANUP PHASE** Players move Influence Discs from the action spaces back to their Influence Track and new Technology Tiles are drawn

## ACTION PHASE

### ACTION PHASE

Starting from the player with the Starting Player Marker and moving clockwise, each player may **take one action or pass**. This continues around until all players have passed. The first player to pass gets the Starting Player Marker for the next round. When taking an action, move the rightmost Influence Disc from your Influence Track to your Action Track. You may choose an Action you have already taken. The more actions you take, the more Upkeep you have to pay at the end of the round, so remember to pass in time!

The possible actions are:

- EXPLORE
- INFLUENCE
- RESEARCH
- UPGRADE
- BUILD
- MOVE
- REACTION (UPGRADE, BUILD OR MOVE)

**EXAMPLE!** There is an example of a full Action Phase on pages 16–17.

Players who have passed may not take any other actions than **Reactions**, which are weaker versions of Build, Upgrade and Move actions (*see Reactions on page 14*). When passing, flip your Summary Card so that the dark, game round overview side is face up. This will help other players to see who have already passed.

**END OF ACTION PHASE** After every player's Summary Card has been flipped dark side up, the Action phase ends **immediately**. No more Reactions may be taken.

**COLONY SHIPS** At any time during your action, you may activate one or more of your face up Colony Ships. For each activated Colony Ship, you may place one Population Cube to an empty Population Square in any hex where you have an Influence Disc. Each Population Cube you place must come from the Population Track that corresponds to the color of the Population Square on the hex. Activated Colony Ships are flipped face down. Using Colony Ships is **the only way to move Population Cubes to the hexes** and increase your production! In the example on the right, Blue activates two Colony Ships and flips them face down. He moves two Population Cubes to the hex.

**GRAY SQUARES** The gray planets represent worlds that are suitable for any production. The gray Population Squares may receive a Population Cube from any of the three Population Tracks. If you remove a cube from a gray Population Square, you may place it to any Population Track (ie. you don't have to remember which track it came from).

**ADVANCED SQUARES** Planets with a star symbol represent harsher worlds that are difficult to colonize. You may only place cubes in the squares marked with a star if you have researched the related Advanced Technology.

**ORBITALS** Orbitals are artificial living environments that players may build. An Orbital may only receive a Population Cube from the Money or Science track.

**EXPLORE** action lets your civilization explore the uncharted regions of the galaxy.

# EXPLORE

Choose one of the unexplored spaces **next to a hex where you have a Ship or an Influence Disc** and turn a hex tile from the corresponding stack (I, II or III) in it. If you Explore from a hex with only a Ship, it must not be "pinned" (see *Move on page 14*).

Choose to either place or discard the tile. If you discard the tile, your turn ends immediately. If you decide to place the tile, the following restrictions apply:

- the hex can be placed only to the spot that you explored
- the hex must be oriented so that at least one of the Wormholes on the hex connects with a Wormhole on one of the hexes where you have a disc or a Ship

In the diagram on the left, hexes marked with A and B would be legal placements.

Hexes in Areas I and II are laid in circles around the central hex; hexes in Area III may branch outwards (see *layout example on page 7*).

## WORMHOLE GENERATOR

If you have the **WORMHOLE GENERATOR** Technology, you may place the hex so that there is only a half Wormhole connecting the placed hex and the hex you Explored from. In the diagram above, when using the Wormhole Generator, placements A, B, C and D would be legal, but E wouldn't.

If the hex contains a **Discovery** symbol, put a Discovery Tile on it face down.

If the hex contains **Ancient** symbols, put that many Ancient Ship tiles on it. Put a Discovery Tile face down under the Ancient Ship(s).

After placing the hex, you may take control of the hex by placing an Influence Disc from your Influence Track on the hex. If the hex contains a Discovery Tile, you may take it when placing the Influence Disc. All Discovery Tiles are double sided: the tile back has a 2 VP value, and the face side has a bonus (see *page 7*). Look at the face side of the Discovery, and immediately decide which side to use. Tiles that are used as Victory Points are placed next to your Player Board with the side showing the Victory Point value face up.

**Important! Ancient Ships** must be destroyed (see *Combat Phase, page 18*) before the Influence Disc may be placed and the Discovery Tile taken. If there are Ships of several players competing for the same hex, the player who eventually gets to place the disc receives the tile.

The Center hex contains the **Galactic Center Defense System**, which must be destroyed (see *Combat Phase, page 18*) before an Influence Disc may be placed.

After placing the Influence Disc, you may activate your Colony Ships to place Population Cubes on the Population Squares on the hex.

If the hexes in a stack run out, shuffle the discarded hexes of that stack as a new stack. If there are no more hexes, the Explore action has no use.

### IMPORTANT!

Remember that you may use your Colony Ships at any time during your turn.

# INFLUENCE

**INFLUENCE** action lets your civilization conquer vacant hexes or withdraw from hexes.

inf

By selecting the Influence action, you may move up to two Influence Discs. These moves may be:

- from your Influence Track or from a hex where you have an Influence Disc to a hex that does not contain an Influence Disc or an enemy Ship and is adjacent to a hex where you have a disc or a Ship. The hex Influenced has to have a Wormhole connection to the hex where you have a disc or a Ship. In the example on the right, you could Influence hexes A and B.
- from a hex where you have an Influence Disc back to your Influence Track

After placing an Influence Disc, you may activate your Colony Ships to place Population Cubes on the Population Squares on the hex.

After moving the discs, you may also turn two Colony Ships face up.

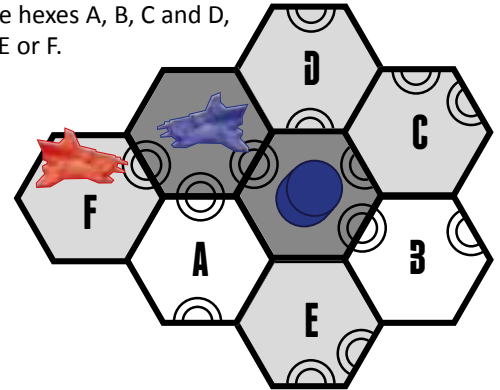

ACTION PHASE

## WORMHOLE GENERATOR

If you have the **WORMHOLE GENERATOR** Technology, you may Influence through a hex edge that has a Wormhole on just one side.

In the example below, Blue could Influence hexes A, B, C and D, but not E or F.

**REMOVING A DISC FROM A HEX** If you remove an Influence Disc from a hex, you must also return all cubes from the hex to their respective Population Tracks on your board.

## IMPORTANT!

Remember that you may use your Colony Ships at any time during your turn.

**DIPLMATIC RELATIONS**  
increase your production  
and grant Victory Points.

**DIPLMACY**

Players can form Diplomatic relations when their hexes connect. Diplomacy rules are **not** used in the two and three player games.

**DIPLMATIC RELATIONS** If one of the hexes where you have an Influence Disc gets connected through a Wormhole to a hex where another player has a Disc, you and the other player may agree on forming Diplomatic relations with each other. If you both agree, give the other player one of your **Ambassador Tiles** and place one of your Population Cubes on top of it. The cube may come from any of the three Population tracks. The Tile is placed on one of the free spaces on the other player's Reputation Track. The other player also gives you an Ambassador Tile and a Population Cube. Place them on an empty space on your Reputation Track.

**AMBASSADOR TILE**

Diplomatic relations can be formed at any time on your turn. The connection may happen either by Explore or Influence actions, or at the end of the Combat Phase (see page 21).

Ambassador Tiles on your Reputation Track are worth 1 Victory Point at the end of the game. Note that your Reputation Track also holds your Reputation Tiles (see Combat on page 18). If the board is full when taking an Ambassador Tile, you may discard Reputation Tiles, returning them to the Reputation Tile bag.

You may not have more than one Ambassador Tile from each player. You may rearrange the tiles on your Reputation Track at any time, but you may not discard Ambassador Tiles. Note that the Terrans have one space that may only hold an Ambassador Tile.

**BREAKING DIPLOMATIC RELATIONS** Your Diplomatic relations stay in effect until the end of the game, unless you attack one of the players you have Diplomatic relations with, or they attack you. **Moving your Ships to a hex where the other player has a disc or a Ship is considered an attack.** Both players then return the Ambassador Tiles and cubes to the owner. The cube goes back to a Population Track, chosen freely by the owner.

Whenever you attack a player and thus break the Diplomatic relations, you receive the **Traitor Card** from its previous holder. The player holding the Traitor Card may not form new Diplomatic relations as long as he has the marker. **Whoever holds the Traitor Card at the end of the game receives a -2 VP penalty.**

- May hold either an Ambassador or a Reputation Tile
- May hold only an Ambassador Tile
- May hold only a Reputation Tile

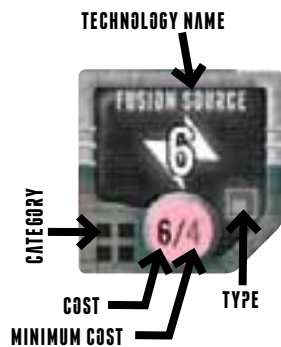

# RESEARCH

RES

ACTION PHASE

By taking the Research action, you may choose one available Technology Tile from the Supply Board, pay its Science cost (move the Storage Marker backwards on the Storage Track) and put the tile on your Player Board on the track of its category (Military, Grid or Nano). For each Technology of that category you already have, you get a discount shown on the leftmost exposed space on the Technology Track.

However, note that for each Technology there is a minimum cost you have to pay regardless of the discount you have.

There are three special types of Technologies:

- Ship Part:** gives the ability to Upgrade this Ship Part.
- Build:** gives the ability to Build this Ship or Structure.
- Instant:** instant one-time effect when it is Researched.

**EXAMPLE:** You already have **Neutron Bombs** and **Plasma Cannon** Technologies and you research **Starbase**. Your Military Technology discount is  $-2$ , but you still have to pay 3 Science, since it is the minimum cost for Starbase.

You may not choose a Technology that you already have.

The Technologies are kept on your Technology Tracks until the end of the game. They may not be discarded.

**RESEARCH** action lets your civilization develop new technologies.

## MILITARY TECHNOLOGIES

**Neutron Bombs:** If you have the Neutron Bombs Technology, you may destroy all the Population Cubes from the hex after the combat without rolling any dice (see *Combat Phase* on page 18).

**Starbase:** You may Build Starbases.

**Plasma Cannon:** You may Upgrade **PLASMA CANNON** Ship Parts.

**Phase Shield:** You may Upgrade **PHASE SHIELD** Ship Parts.

**Advanced Mining:** You may place Population Cubes in the Advanced Materials squares with your Colony Ships.

**Tachyon Source:** You may Upgrade **TACHYON SOURCE** Ship Parts.

**Plasma Missile:** You may Upgrade **PLASMA MISSILE** Ship Parts.

**Gluon Computer:** You may Upgrade **GLUON COMPUTER** Ship Parts.

## GRID TECHNOLOGIES

**Gauss Shield:** You may Upgrade **GAUSS SHIELD** Ship Parts.

**Improved Hull:** You may Upgrade **IMPROVED HULL** Ship Parts.

**Fusion Source:** You may Upgrade **FUSION SOURCE** Ship Parts.

**Positron Computer:** You may Upgrade **POSITRON COMPUTER** Ship Parts.

**Advanced Economy:** You may place Population Cubes in the Advanced Money squares with your Colony Ships.

**Tachyon Drive:** You may Upgrade **TACHYON DRIVE** Ship Parts.

**Antimatter Cannon:** You may Upgrade **ANTIMATTER CANNON** Ship Parts.

**Quantum Grid:** You receive two additional Influence Discs, placed immediately in the leftmost empty circles on your Influence Track.

## NANO TECHNOLOGIES

**Nanorobots:** You may Build one additional Ship or Structure (excluding Reaction Builds).

**Fusion Drive:** You may Upgrade **FUSION DRIVE** Ship Parts.

**Advanced Robotics:** You receive one additional Influence Disc, placed immediately in the leftmost empty circle on your Influence Track.

**Orbital:** You may Build Orbitals.

**Advanced Labs:** You may place Population Cubes in the Advanced Science squares with your Colony Ships.

**Monolith:** You may Build Monoliths.

**Artifact Key:** You must immediately take 5 Resources for each Artifact on your hexes. The Resources can be either Money, Science or Materials, in groups of five.

**Wormhole Generator:** You may Explore, Influence and Move through a hex edge that has a Wormhole on just one side.

**UPGRADE** action lets your civilization modify their Ships.

# UPGRADE

UPG

ACTION PHASE

When choosing the Upgrade action, you may modify your Ships' blueprints by placing new Ship Parts there. Each of your Ships functions according to its blueprint described on your Player Board. If you upgrade the Ship's blueprint with new Ship Parts, all the Ships already built are considered to be instantly upgraded.

With the Upgrade action, return as many Ship Part Tiles to the Supply Board as you want. Then take up to **two** tiles from the Supply Board and place them on **any** of the squares on your Ship blueprints. When placing the tiles, you may place the tiles on top of any of the printed starting Ship Parts on your Ship blueprints.

**CANNONS + MISSILES:** For each colored square in your Ship, roll the corresponding colored die. The damage a hit inflicts is represented by the star symbols: each star ★ is one point of damage.

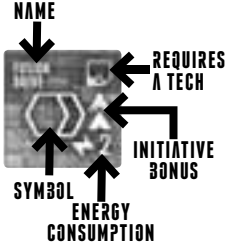

**COMPUTERS:** Make hitting easier by adding bonuses to your die rolls: your combined Computer value is added to your die rolls to hit.

**SHIELDS:** target's combined Shield value is subtracted from your die roll to hit.

**HULL:** each Hull symbol ★ absorbs one point of damage received.

**DRIVES:** each hex pictured increases the Ship's Movement Value by one.

**ENERGY SOURCES:** provide energy for other Ship Parts.

- The following restrictions apply:
- most Ship Parts (marked with the Technology symbol) require that you have researched the corresponding Technology (see Research on page 12) before they can be taken;
  - the total Energy Consumption of the Ship's parts may not be higher than its total Energy Production; and
  - Interceptors, Cruisers and Dreadnoughts must have a Drive, Starbases may not have a Drive.

**Taking and returning Ship Parts costs nothing.**

**All values from the Ship Parts are cumulative.** For example, if the Ship has two Fusion Drives, they will give it Movement Value 4, Initiative 4 and Energy Consumption 4.

**BUILD** action lets your civilization build new Ships and Structures.

# BUILD

BUi

	<b>BUILDING COSTS</b> 			
SHIPS		Interceptor	3	
		Cruiser	5	
		Dreadnought	8	
		Starbase	3	
STRUCTURES		Orbital	5	
		Monolith	10	

Build up to two Ships (Interceptors, Cruisers, Dreadnoughts and Starbases) or Structures (Orbitals and Monoliths). Pay their  Material cost (move the Storage Marker backwards on the Storage Track) and place them in any of the hexes where you have an Influence Disc.

- The following restrictions apply:
- the amount of Ships is limited to the miniatures and tiles you have, ie. 8 Interceptors, 4 Cruisers, 2 Dreadnoughts and 4 Starbases
  - each hex may only have one Monolith and Orbital
  - building Starbases, Orbitals and Monoliths require that you have the corresponding Technology (see Research on page 12)

# MOVE

**MOVE** action lets your civilization move its Ships.

The Move action allows you to move your Ships. By choosing the Move action, you may do up to three Ship movements consecutively. With each move, the Ship may move as many hexes as its Movement Value allows. Movement Value depends on its Drives (each hex pictured increases the Ship's Movement Value by one; in the case of multiple Drives, the Drive values are cumulative; see *Upgrade on page 13*). Starbases may not have Drives and therefore cannot move.

**Note the restriction on Movement!** The Ships may only move through a hex edge that has a Wormhole on both sides. In the example on the right, movement A would be legal.

You may only move to Explored hexes, not to empty space.

If the Ships move to a hex containing other player's or Ancient Ships, at least one Ship per each opposing Ship must stop (the Ship is "pinned") and engage in combat in the Combat Phase (see *pages 18–21*). The Ships exceeding the number of opponents may continue their movement.

The Galactic Centre Defense System ("GCDS") engages all the Ships in the central hex. The hex cannot be moved through before the GCDS is destroyed.

**WORMHOLE GENERATOR** If you have the **WORMHOLE GENERATOR** Technology, you may move your Ships through a hex edge that has a Wormhole on just one side. In the example below, movements A, B and C would be legal.

ACTION PHASE

## MOVEMENT EXAMPLE

**Red's** Interceptor has a Movement Value of 2 hexes (two Nuclear Drives combined) and Cruiser has a Movement Value of 3. **Red** has a total of three moves. He moves the Interceptor two times and the Cruiser one time.

**Green's** Interceptors also have a Movement Value of 2, and **Green** has three moves. When moving, his first Interceptor is pinned by the **Red** Interceptor. The second one may move through the hex. Finally, **Green** decides not to use his third move.

# REACTION

**REACTIONS** can be taken after you have passed.

After passing, you may only take a **Reaction action** when it is your turn in the player order. A Reaction is essentially a weakened version of a Move, Build or Upgrade action.

Reaction can be either:

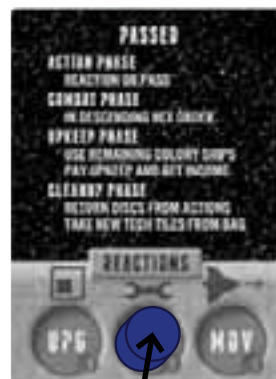

**UPGRADE:** you are allowed to take **one** Ship Part.

**BUILD:** you are allowed to build **one** Ship or Structure.

**MOVE:** you are allowed to move **only one** Ship **once**.

A Reaction is taken by placing an Influence Disc on the Reaction Track on your Summary Card.

The **Nanorobots** Technology (see *Research on page 12*) does not give you an extra build when taking a Reaction.

EXAMPLE OF A FOUR PLAYER GAME IN PROGRESS

## ACTION PHASE EXAMPLE

**Alastair** (Terran), **Ken** (Planta), **Iain** (Mechanema) and **Vernor** (Progress) have already played a few rounds, taking control of sectors and developing their civilizations. Alastair is the starting player for this Action Phase.

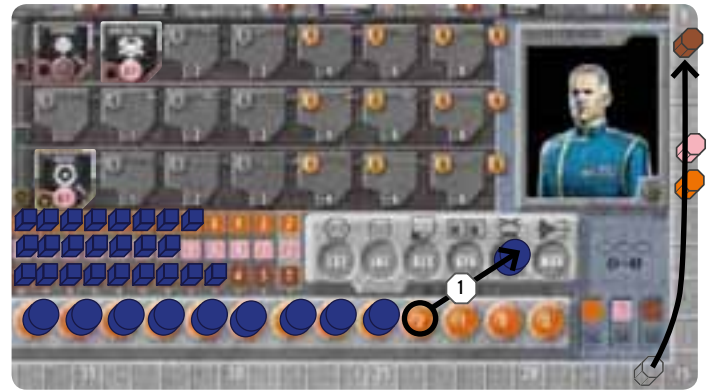

**Alastair** decides to **BUILD**. He moves the rightmost disc from his Influence Track to the Build space on his Action Track [1]. Alastair then builds one Cruiser and one Orbital. The cost is 10 Materials, so he moves the Materials marker 10 spaces backwards on his Storage Track. Alastair was allowed to build the Orbital since he has researched the Orbital Technology. He places the Cruiser and the Orbital on his hexes [2]. Alastair's turn is over, and it is Ken's turn, as he sits clockwise next to Alastair.

**Ken** **EXPLOREs** and moves a disc to the corresponding action space. He chooses an empty space he wishes to explore and then turns the top hex tile from the corresponding stack -- in this case, Middle Sectors (II). He decides whether to place the hex or discard it, and chooses to place [3]. He places the hex so that there is at least one full Wormhole connecting the new hex and one of his hexes. There is a Discovery symbol on the hex, so he also places a random Discovery Tile face down on it. Ken chooses to immediately place an Influence Disc on the hex, moving the rightmost disc from his Influence Track to the hex [4]. Placing the disc allows him to collect the Discovery Tile. He looks at the tile and decides to keep it as Victory Points, so he places the tile VP side up next to his boards. Ken also decides to colonize the Money and Science squares on the newly placed hex. He flips two Colony Ships face down and moves one cube from both Money and Science Population Tracks to the Population Squares on the hex [4]. Planta has a special ability which allows the player to explore two hexes with one action. Ken thus Explores another empty area [5], this time in Outer Sectors (III). The hex he turns from the stack isn't to his liking, so he discards it, placing it face up next to the pile. When the Outer Sectors stack runs out, its discards will be shuffled into a new Outer Sectors stack.

It's now **Iain's** turn, and he decides to **UPGRADE** his Ships, moving a disc to the Upgrade action space. Mechanema's special ability allows him to take three Ship Part Tiles instead of the regular two. He first returns a Electron Computer tile from the Interceptor blueprint on his Player Board [6] and then takes an Plasma Missile tile, a Positron Computer tile and a Plasma Cannon tile. He places the Plasma Missile on his Interceptor [7] and the Positron Computer and Plasma Cannon tiles on his Cruiser [8]. Iain is allowed to take Plasma Missile and Positron Computer tiles, since he has researched the related Technologies [9].

**Vernor** **RESEARCHes**: he moves a disc to the Research action space and chooses Fusion Drive from the Supply Board. He already has four Nano Technologies, which would grant him a discount of 4, but the minimum price for Fusion Drive is 3. He pays the Science cost, moving the marker 3 spaces backwards, and places the Fusion Drive Technology Tile on his Player Board [10]. Progress's special ability allows them to Research two Technologies with one action. Vernor decides to also research the Wormhole Generator. The discount is now 6, so the Science cost is 10. He pays the the cost and places the Technology Tile on his Player Board [11].

This example uses some alien species. Their special abilities are presented in more detail on pages 26–27.

It is **Alastair's** turn again. He **EXPLOREs** in Outer Sectors and turns a hex with two Ancient symbols. After placing the hex, he places a random Discovery Tile face down on the hex and two Ancient Ship Tiles on top of it [12]. An influence disc may not be placed in the hex before the Ancient Ships are destroyed.

**Ken** **EXPLOREs** again. This time he goes for the Outer Sectors and decides to place the two hexes on the board [13]. He flips his remaining two Colony Ships face down and places a cube from the Money track and a cube from the Materials track on the first hex. He is allowed to place a cube on the the Advanced Mining square [14], since he has researched the Advanced Mining Technology [15]. The remaining Population Squares on the hexes remain empty, since he has no more Colony Ships available. Ken now also has a direct Wormhole connection from one of his hexes to one of Alastair's hexes [16]. He is thus able to propose Diplomatic Relations to Alastair. Alastair agrees, so they both give each other one of their Ambassador Tiles, along with one freely chosen Population Cube. The tiles are placed on their Diplomacy Tracks. Alastair's track is already full of Reputation Tiles, so he removes one of them [17] and puts it back to the bag.

**Iain** **passes**, turning his Summary Card over, showing the darker game overview side up [18]. Since he is the first player to pass on this round, he gets the starting player marker and will be the first to act in the Action Phase on the next round.

**Vernor** chooses **MOVE** and sets out to attack his neighbor Iain. He moves his two Interceptors to one of Iain's hexes and containing three Interceptors [19]. Vernor's Ships are allowed to move through a half Wormhole, since he has the Wormhole Generator Technology. Vernor and Iain had earlier established Diplomatic Relations, now broken by Vernor's attack. Both return the Ambassador Tile to the owner. The cube on the tile is placed on any of the owner's Population tracks. Vernor also takes the Traitor token. No-one may establish Diplomatic Relations with him as long as he holds it. Also, if he retains the token until the end of the game, he will be given a -2 Victory Point penalty.

It is **Alastair's** turn. He passes and flips his Summary Card over.

**Ken** chooses **INFLUENCE**. He is allowed to move two Influence Discs, and he decides to take back the discs from the two "empty" hexes (the hexes without Population Squares have little use besides their VP value). One disc [20] goes to the uncontrolled hex with two Population Squares and the other [21] back to his Influence Track. After this, he flips two Colony Ships face up. He immediately uses the Ships again, flipping them face down and placing two Population Cubes to his hexes [22].

**Iain**, having passed, may only do a **REACTION**. He decides that the three Interceptors in the hex are not enough against Vernor's attack, so he chooses **MOVE** (placing the Influence Disc on the Action track on his Summary Card [23]) and moves one Cruiser to the contested hex [24]. Reaction only allows one Move, so his turn is now over.

**Vernor** chooses **MOVE** and moves one more Interceptor and one Cruiser to the contested hex [25]. The Cruiser moves two hexes, allowed by its Fusion Drives.

**Alastair** doesn't feel the need to React and passes. **Ken** also passes, and so do **Iain** and **Vernor**. As all players' Summary Cards are now dark side up, the Action Phase ends immediately and Combat Phase begins. There is one battle to be resolved, between Iain and Vernor. (See combat example on pages 22–23.)

## COMBAT PHASE

In the Combat Phase, battles are resolved. A battle will take place if a hex is occupied by more than one party (a party being either a player, the Ancients or the GCDS). If there is a battle in more than one hex, the **battles are resolved in descending numerical order** of the hexes (printed on one corner of each hex). The Center hex has the lowest number and will thus always be resolved last.

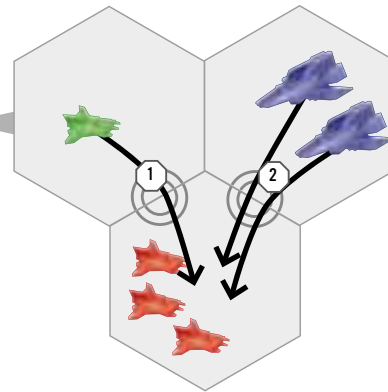

If a hex contains more than two parties, battles are first resolved among the players' Ships with the sole surviving player then engaging the Ancients or the GCDS in battle.

If the hex contains more than two players' Ships, battles between players are resolved two players at a time, in **reverse order of entry** into the hex.

Therefore, the **two players who last entered the hex will battle each other first** and the surviving player will then battle the player who entered before the two. The survivor of that battle will fight the next player in reverse order of entry and so forth. The last surviving player will battle the Ancients, if any.

In the example on the right, the **Red** player is already in the hex. **Green** moves there first, and then **Blue**. **Green** and **Blue** will battle first, and **Red** will then battle the survivor.

If the hex already has an Influence Disc and is thus controlled by a player, that player is always considered the defender and will fight last regardless of the entry order, even if his Ships actually moved there last.

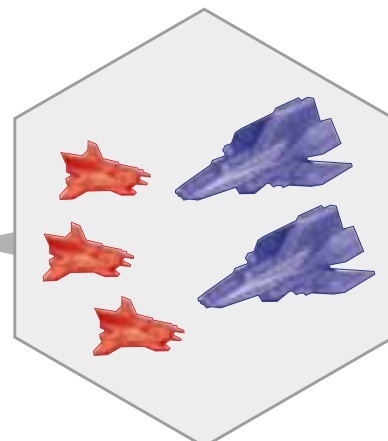

**MAIN CONCEPT** Each **Ship type** (Interceptor, Cruiser...) of each player are activated in Initiative order. The Ship type with the highest Initiative goes first. **All Initiative ties are resolved in the defender's favor.** The defender is always the player who has an Influence Disc on the hex. In the case of a hex with no disc, or a hex with more than two players, the defender is the player who moved there first.

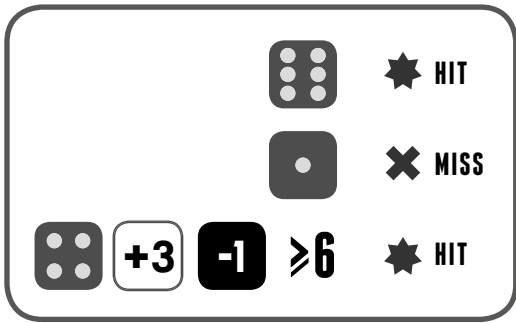

In the example on the right, the **Red** Interceptor's Initiative is 6: 2 for the Ship's default Initiative, +2 for the Computer and +2 for the Drive. The **Blue** Dreadnought's Initiative is 3: 0 for the Ship's default Initiative +1 +1 +1 for the three Drives.

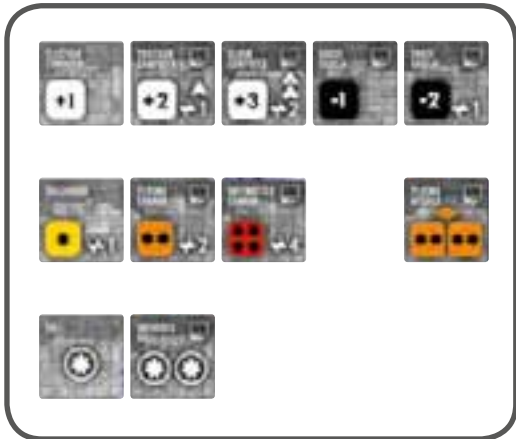

You simultaneously **roll dice for all your Ships of one type.** Which dice are rolled is determined by the number of Ships and by the weapons they carry: for each die symbol in your Ship's blueprint, you are allowed to roll one die of the corresponding color. The dice of different colors allow you to roll for all the weapons in your Ships of the same type simultaneously. After rolling, you choose which enemy Ship you assign each die to (see combat example on pages 22–23). Several dice may be assigned to the same target.

In the example on the right (using the ship blueprints above), the **Red** player would roll three yellow dice, one for the Ion Cannon on each of his Interceptors. **Blue** would roll two yellow dice and two orange dice.

**HITTING** Rolling a **6** is always a hit and rolling an **1** is always a miss, regardless of any bonuses the Ships may have. For other die results, add the value of your Computers to the die roll and subtract the value of the target's Shields. **If you end up with a value equal or greater to 6, the die is a hit.**

**DAMAGE** Different weapons do a different amount of damage when they hit. Ion Cannon (yellow die) inflicts 1 damage, Plasma cannon (orange die) 2 damage and Antimatter Cannon (red die) 4 damage. The amount of damage a cannon inflicts is presented by ★ star symbols on the weapon tile.

By default, **one point of damage will destroy a Ship**. Each ★ Hull symbol on Ship Parts will absorb one point of damage. So, if a Ship has two Improved Hull parts, it will be destroyed by the fifth point of damage. Damage from one die (eg. Plasma or Antimatter Cannons) may not be split to several targets.

If a Ship sustains damage but is not destroyed, mark the damage by placing Damage Cubes next to the Ship.

**ANCIENT SHIPS** Each Ancient Ship has:

- 2 x Ion Cannon
- Electron Computer
- Hull
- Initiative 2

**GALACTIC CENTER DEFENSE SYSTEM** The GCDS has:

- 4 x Ion Cannon
- Electron Computer
- 7 x Hull
- Initiative 0

**FIGHTING THE ANCIENTS AND THE GCDS** One of the other players rolls the dice for the Ancients and the GCDS. If possible, the dice are assigned so that your Ship(s) are destroyed, the largest possible first. If no Ships can be destroyed, the dice should be assigned to inflict as much damage as possible.

## COURSE OF BATTLE

Every battle begins with Ships firing their Missiles (if any) **once** and continues with **repeated Engagement rounds** until only one of the sides remains in the hex.

**MISSILES** All Ship types of each player equipped with Missiles fire their Missiles in Initiative order. You roll two orange dice for each Missile Ship Part.

**ENGAGEMENT ROUND** Each Ship type of each player is activated in Initiative order. Each Ship type of a player may on its turn decide to either **attack or retreat**.

**RETREAT** If you decide to retreat one of your Ship types, all Ships of that type must **on their next turn** (on the next Engagement round) move to a neighboring hex where **you have an Influence Disc and which has no enemy Ships**. The normal Wormhole movement rules must be followed (see an example below). Retreating Ships may be shot at.

**RETREAT EXAMPLE** The **Green** Interceptor decides to retreat from hex A. It may retreat to hex B (only his own disc) but not to C (only his own Ship), D (empty) or E (contains an enemy Ship). **Red** cannot retreat anywhere.

The Engagement round is repeated until one of the sides has been completely removed from the hex. Then the players return the destroyed Ships to their owners.

**STALEMATE** If a battle ends in a situation where it's not possible for either player to destroy the other (this only happens when all ships in a battle have only Missiles), the attacker may retreat. If not, his ships are destroyed.

**ATTACKING POPULATION** After all battles have been resolved, the remaining Ships may attack the population in the hex. Each Ship may attack once with all of its Cannons (Missiles may not be used), using the normal rules to hit. Population is considered not to have any shields. **Each point of damage destroys one Population Cube of your choosing.** If you have the Neutron Bombs Technology, you may destroy all the Population Cubes from the hex without rolling any dice.

Destroyed cubes are returned to the defeated player's Graveyards of the corresponding color. The cubes are returned to their respective Population Tracks in Cleanup Phase (see page 24). If a cube is destroyed from a gray (wild) square, the owner may choose which Graveyard it goes to. Destroying Population Cubes does not grant Reputation Tiles (see next page).

Orbitals and Monoliths may not be attacked, nor are they ever removed from the hex. The population on the Orbital must be destroyed the same way as the other Population Cubes.

**ATTACKING POPULATION EXAMPLE** The **Red** Interceptors attack **Blue's** population once with their Ion Cannons, rolling three yellow dice. Two dice hit (6 is always a hit, and 3+3=6), but the third one misses. **Red** removes two of **Blue's** cubes, but since at least one of the cubes stays on the hex, so does the Influence Disc.

### REPUTATION TILES

BATTLE		
INTERCEPTOR		
STARBASE		
CRUISER		
DREADNOUGHT		
ANCIENT		
GCDS		
MAX		

**REPUTATION TILES** After all battles in a hex have been resolved, each involved player draws Reputation Tiles from the bag as follows:

- 1 tile for taking part in one or more battles
- 1 tile for each opposing Interceptor, Starbase and Ancient Ship destroyed
- 2 tiles for each opposing Cruiser destroyed
- 3 tiles for each opposing Dreadnought destroyed
- 3 tiles for the Galactic Center Defense System destroyed

**You may not draw more than five tiles.** Choose one of the tiles and place it face down on your Reputation Track. Put the rest of the tiles back in the bag. If the track is full, you may return any of your Reputation Tiles (including the one you just drew or one from the track) in the bag. The tiles are drawn in the order the players entered the hex, so that the player who first entered the hex will draw all his tiles first.

### REPUTATION TILE DISTRIBUTION

	x5
	x7
	x9
	x11

**RETREAT PENALTY** If all of your **remaining** Ships retreat from the hex, you get no Reputation Tiles for taking part in the battle, but you still get tiles from destroyed enemy Ships.

**INFLUENCING HEXES** If a hex has no population after all battles have been resolved and you have at least one Ship there, remove the previous controller's Influence Disc (returning it to his Influence Track). After this, you may place your own Influence Disc there. Also, if your Ship is in a hex without an Influence Disc after the Combat Phase, you may place a disc there.

**REPAIR DAMAGE** At the end of the Combat Phase, all the Damage Cubes are removed from the Ships.

**PLAYER ELIMINATION** In the unlikely event that you lose all of your Influence Discs and Ships from the game board, you may no longer place Influence Discs on hexes. You may continue to produce Resources each round (note that you get a minimum of 2 of each Resource, even if you do not have any Population Cubes on the board) and take Research actions, which may still grant a few Victory Points. It is very unlikely that your score will be high, as just the hexes will often grant you over 10 Victory Points. You may also give up the game, counting your score and returning all your game components to the game box.

## COMBAT EXAMPLE

Iain and Vernor are engaged in battle. Iain is the defender.

The combat begins with the **PLASMA MISSILES**.

Iain will roll two orange dice for the Plasma Missiles in each Interceptor, hitting with a roll of 6.

Vernor will roll two orange dice for the Plasma Missiles in each Interceptor, hitting with a 6, and two orange dice for the Plasma Missiles in the Cruiser, hitting with a 6.

The Initiative order is:

- Vernor's Interceptors  
Initiative 4 (Ship default 2 + Fusion Drive 2 = 4)
- Iain's Interceptors  
Initiative 3 (Ship default 2 + Nuclear Drive 1 = 3; defender first)
- Vernor's Cruiser  
Initiative 3 (Ship default 1 + Fusion Drive 2 = 3)

[1]: Vernor rolls 6, 6, 5, 4, 3 and 2 for the Plasma Missiles in his Interceptors. He decides to assign the 6's to Iain's two Interceptors. The rest of the rolls are misses. Iain's Interceptors both receive two points of damage from the Plasma Missile and are destroyed. Vernor takes the Ships and puts them next to his Player Board.

[2]: Iain rolls 6 and 6 for the Plasma Missiles in his remaining Interceptor. He assigns one 6 to one of the Interceptors and the other 6 to the Cruiser. Vernor's Interceptor receives two points of damage and is destroyed. Iain takes the Ship and puts it next to his Player Board. Vernor's Cruiser receives two points of damage, which is not enough to destroy it. Vernor places two damage markers next to the Cruiser.

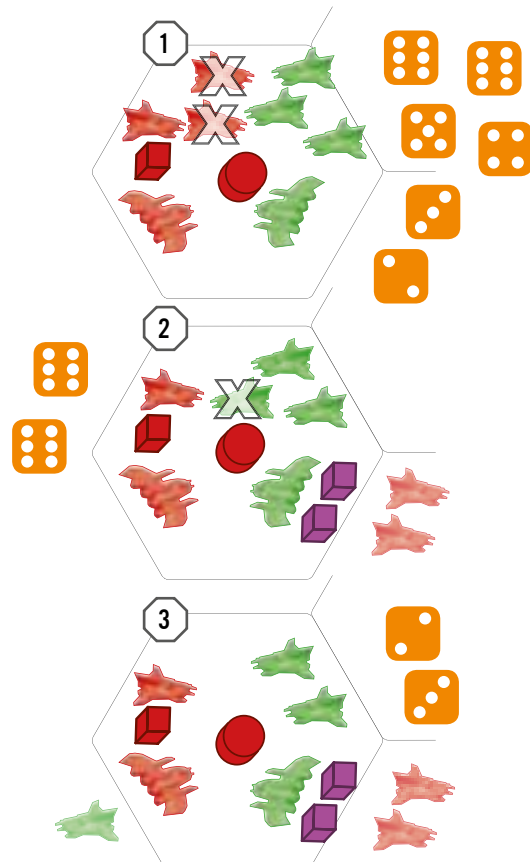

[3]: Vernor then rolls 3 and 2 for the Plasma Missiles in his Cruiser, which result in misses.

The battle continues with **ENGAGEMENT ROUNDS**.

Iain now has one Interceptor and one Cruiser left. Vernor has two Interceptors and one Cruiser.

In the combat, Iain's Interceptor attacks with one yellow die that hits either type of Vernor's Ships with a roll of 6. Iain's Cruiser attacks with two yellow dice, hitting Vernor's Interceptors (which have no shields) with a roll of 4 or higher, and Vernor's Cruiser with a roll of 5 or higher (Gauss Shield subtracts 1 from each die assigned to it).

Vernor will roll one yellow die for the Plasma Cannon in each Interceptor, hitting either of Iain's Ships with a roll of 6, and one orange die for the Ion Cannon in the Cruiser, hitting either Ship with a roll of 6.

The Initiative order is:

- **Vernor's** Interceptors  
Initiative 4 (Ship default 2 + Fusion Drive 2 = 4)
- **Iain's** Interceptor  
Initiative 3 (Ship default 2 + Nuclear Drive 1 = 3; defender first)
- **Iain's** Cruiser  
Initiative 3 (Ship default 1 + Nuclear Drive 1 + Positron Computer 1 = 3; defender first)
- **Vernor's** Cruiser, Initiative 3 (Ship default 1 + Fusion Drive 2 = 3)

[4]: **Vernor** decides to retreat the Interceptors, moving them between the current hex and the hex he wants to retreat to.

[5]: **Iain** attacks with his Interceptor and rolls for the Ion Cannon: 6. He assigns the 6 to one of the retreating Interceptors, destroying it. He places the destroyed Ship next to his Player Board.

[6]: **Iain** attacks with his Cruiser and rolls for the Ion Cannons: 3 and 2, both misses.

[7]: **Vernor** attacks with his Cruiser and rolls for the Plasma Cannon: 6, which he assigns to one of the Interceptors. It is destroyed and **Vernor** puts it next to his Player Board.

**The first Engagement round ends and next begins.**

[8]: **Vernor's** remaining Interceptor retreats, moving to the neighbouring hex. **Iain** attacks with his Cruiser and rolls for the Ion Cannons: 1 and 2, misses.

[9]: **Vernor** attacks with his Cruiser and rolls a 6. He assigns it to the Cruiser, which receives two points of damage and is destroyed. **Vernor** places the destroyed Ship next to his Player Board.

[10]: The battle ends, as **Iain's** final Ship is destroyed. As there are no more enemy Ships in the hex, **Vernor** may now attack **Iain's** Population Cubes. He rolls a 6 for the Ion Cannon in his Cruiser, destroying **Iain's** Money Population Cube. The cube goes to **Iain's** Graveyard. As this was **Iain's** last cube on the hex, he also has to remove his Influence Disc, returning it to his Influence Track. **Vernor** may now place his own Influence Disc in the hex and does so. He also removes the Damage Cubes from his Cruiser.

Players return the destroyed Ships to each other and draw Reputation Tiles. **Iain** draws a total of three tiles: one tile for the battle, and two tiles for the two destroyed Interceptors. He looks at them and keeps the highest one, returning the rest to the bag. **Vernor** then draws five tiles: one tile for the battle, two tiles for the two destroyed Interceptors and two tiles for the destroyed Cruiser. Note that he only draws five tiles, even though he destroyed three Interceptors, as the maximum amount you may draw is five. He looks at the tiles and keeps the highest one, returning the rest to the bag.

All battles have been resolved, so Combat Phase ends and **Upkeep Phase** begins.

## UPKEEP PHASE

**COLONY SHIPS** First, you may activate one or more of your remaining Colony Ships (see *Colony Ships on page 8*) and move Population Cubes to hexes.

**CIVILIZATION UPKEEP** Collect your Income and pay your Civilization Upkeep cost. This is done by comparing your positive Money Income (the highest exposed number on your Money Population Track) with your Influence Cost for that turn (the highest exposed number on your Influence Track). Then adjust your Money Storage marker on the Storage Track by this net amount (upwards by any excess Income and downwards by any deficit).

**TRADE** At any time, you may convert 2 units of one Resource (Money, Science or Materials) to 1 unit of any other.

Note that only Terrans have a 2:1 Trade rate. The rate depends on the species you play.

**BANKRUPTCY?** The Money storage marker may not move below zero; if that would happen, you must give up control of some of your sectors by removing Influence Discs from the hexes and return them on your Influence Track until the Influence Cost is small enough, or trade other Resources (Science and Materials) for Money. All Population Cubes from these hexes are moved to their respective Population tracks on your Player Board. Note that if you have to return Money cubes from the hex, they return to the Money Population track, reducing the Income as well.

In the unlikely event that you do not have enough Influence Discs to remove, your civilization has collapsed and your game ends here. Count your score and return all your game components to the game box.

In the example on the right, the Blue player's Income is 4 and Upkeep is -5. As the sum of these is  $4 - 5 = -1$ , he must pay 1 Money from his Storage. If he doesn't have Money in the Storage, he must either trade other resources to Money or return one Influence Disc from his hexes to the Influence Track. Returning a disc would bring the Upkeep to -3, which would bring the sum to  $4 - 3 = 1$ . He would then add 1 Money to his Storage.

**SCIENCE AND MATERIALS PRODUCTION** After paying the Civilization Upkeep cost, collect the Science and Materials Production and move the Storage Markers on the Storage Track accordingly. In the example on the right, Blue would collect 6 Science and 3 Materials.

## CLEANUP PHASE

Draw new Technology Tiles (according to the number of players) from the bag and place them on their respective spots on the Supply Board.

Each player moves all the Influence Discs from his Action Track back to his Influence Track and all cubes (if any) from the Graveyards to the respective Population Tracks. If a Population Track is full, the cube must be moved to an another track.

Then each player flips all his Colony Ships face up and the Summary Card the Action overview side up.

Move the Round Marker one step forward. A new round begins with the Action Phase.

### NEW TECH TILES

- +  2 players: 4
- 3 players: 6
- 4 players: 7
- 5 players: 8
- 6 players: 9

The game ends after the 9th round. The player with the most Victory Points is the winner.

**VICTORY POINTS** are gained from:

- Reputation Tiles (1–4 VP per tile)
- Ambassador Tiles (1 VP per tile)
- Hexes with an Influence Disc (1–4 VP per hex)
- Discovery Tiles (2 VP per tile that was kept VP side up)
- Monoliths on own hexes (3 VP per Monolith)
- Progress on the Technology Tracks:  
4 Technology Tiles on a track = 1 VP,  
5 tiles = 2 VP, 6 tiles = 3 VP, 7 tiles = 5 VP
- Traitor Card (–2 VP!)
- Species bonuses

In case of a tie, the total amount of Resources (Money, Science and Materials) in each tied player's Storage is the tie breaker.

## TWO PLAYER GAME

The two player game is strategically slightly different from the multiplayer game. Players should also be advised that the Descendants and Planta benefit from their species-specific fast expansion capabilities and are thus stronger than other species in a two-player setting. It is recommended not to use these species in a two player game.

ERIDANI EMPIRE

*Epsilon Eridani, the capital system of the Empire in its heyday, was a sight yet unrivalled: whole moons – some records claim even planets – were shaped to celebrate the might and wisdom of the Forever Emperor. Their wealth was beyond anything ever documented. Yet, after surviving through what they call the Silent Era, the Empire has been reduced to rubble. The resources of the capital system have been depleted and most of their power disintegrated, yet the Heirs have not given up hope. The new dawn may rise in the uncharted systems.*

DIFFERENCE FROM TERRANS

- Draws two random Reputation Tiles in the beginning of the game
- With the Move action may move up to two Ships, or one Ship twice
- Two Influence Discs less (leave two right-most Influence Track circles empty)
- Reputation Track
- Different Ship blueprints
- Initial Technologies: Gauss Shield, Fusion Drive, Plasma Cannon
- Trade rate 3 : 1
- Starting Storage: 26 2 4
- 222** Starting Sector number

HYDRAN PROGRESS

*Never satisfied, never complete – the Progress are ever striving further. The Hydrans have long since embraced technology as their main interest, constantly evolving and augmenting their society and even themselves with new inventions. The speed of their technological progress is unparalleled among the Seven. Although very difficult to access by the layman, the universities and laboratories of Beta Hydri are held in very high esteem by the scientists species-wide.*

- With the Research action may buy two Technologies
- With the Move action may move up to two Ships, or one Ship twice
- Reputation Track
- Initial Technologies: Advanced Labs
- Trade rate 3 : 1
- Starting Storage: 2 5 2
- 224** Starting Sector number

PLANTA

*Even though they are by far the most different species of the Seven, the Planta have long been a steady Council member. Being a moss-like species with a distributed sentience, their intentions are sometimes difficult to decipher. After overgrowing most of the planets and moons in the Cygnus system, they seem to be content in just expanding their lush growth in new systems, fully co-operating with the other species, who mostly regard them as harmless companions. The Planta are phenomenal navigators, which makes them very respected in interspecies trading vessels.*

- With the Explore action may explore two hexes
- With the Move action may move up to two Ships, or one Ship twice
- Four Colony Ships
- Population Cubes are automatically destroyed by an enemy Ship at the end of the Combat Phase
- / 1 extra VP for each controlled hex at the end of the game
- Reputation Track
- Different Ship blueprints
- Initial Technologies: Starbase
- Trade rate 3 : 1
- Starting Storage: 4 4 4
- 226** Starting Sector number

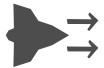

**PLAYER BOARDS** The species' abilities are marked on the Player Boards with these symbols.

## DESCENDANTS OF DRACO

The Descendants are rumoured to be directly related to the Ancients. While there is no concrete proof on this, the statistics show that the survival ratio in the Descendant-Ancient contact is significantly higher for the Descendants than the other Seven. Hailing from the Draco system, the Descendants are a somewhat elusive species. While they are a fully recognized member of the Galactic Council, their Ambassadors still often cause discomfort among the other species.

### DIFFERENCE FROM TERRANS

-  May not battle Ancient Ships, but may place Influence Discs in hexes containing them; may not collect the Discovery Tiles from the Ancient hexes
-  With the Explore action may turn 2 hexes and choose one, or discard both
-  → With the Move action may move up to two Ships, or one Ship twice
-  /  1 VP per Ancient Ship left on the game board at the end of the game
-  Reputation Track
-  →  Trade rate 3 : 1
- Starting Storage:  
 2  4  3
- 228** Starting Sector number

## MECHANEMA

After a long and difficult process, the Mechanema have only recently been accepted as a full member of the Council. Although they have been proven sentient in every legal way defined by the other Seven, and the Auriga system has been assigned as their sovereignty by the Council, there are still occasional disputes on the matter. The birth of the species dates back in the early days of the Galactic Center, when the artificial intelligences of various species were allowed to integrate. The Mechanema are quite respected for their technological advancements – in fact, the basic Ship types now commonly used among the spacefaring races were originally designed by them.

-  With the Upgrade action, may take up to 3 Ship Part Tiles from the Supply Board
-  With the Build action, may build up to three Ships or Structures
-  → With the Move action may move up to two Ships, or one Ship twice
- Cheaper Building costs
-  Reputation Track
- Initial Technologies: Positron Computer
-  →  Trade rate 3 : 1
- Starting Storage:  
 3  3  3
- 230** Starting Sector number

## ORION HEGEMONY

The Hegemony originally hails from the Orion system, but their fleets are known to have actively patrolled the general volume since the early times. The tragedy that fell upon the Terran Federation Dreadnought "Juri Gagarin" and its accompanying fleet may well have been due to a grave misunderstanding in interspecies communication – plausible enough in a mutual First Contact. The long war that followed and their seemingly overwhelming military power gave the Hegemony their commonly used name. After the peace was established and the interspecies collaboration took its first steps with the creation of the original Galactic Center, the Hegemony has now been recognized as a benevolent species, and their past as a ruthlessly efficient war machine has been reduced to a historical side note.

-  Starts with a Cruiser instead of an Interceptor
-  → With the Move action may move up to two Ships, or one Ship twice
-  Reputation Track
- Different Ship blueprints
- Initial Technologies: Neutron Bombs, Gauss Shield
-  →  Trade rate 4 : 1
- Starting Storage:  
 3  3  5
- 232** Starting Sector number

## TERRAN FACTIONS

Although the species is still known as the Terrans, its different factions have long since left their home system and now call new, distant systems their home. After the wormhole drive technology was discovered, the six main factions set out to colonize the nearby systems, leaving the ruined and dying home planet behind. The Terrans have proven to be a surprisingly adaptable and versatile species. After surviving the near-disastrous First Contact and the subsequent war with the species they named the Hegemony, they have made rather steady development and are now more or less unanimously regarded as a reliable member of the Galactic Council. The main drawback of the Terran society, and probably the reason prohibiting them to rise to true greatness, is their inherent need to squabble and form miniature factions amongst themselves.

### TERRAN DIRECTORATE

The Directorate governs the Procyon sector with a strong hand. A seat in the Inner Circle is only given to the very best, carefully chosen (and rumouredly even genetically programmed) to continue the line of the Directors. While there may be power struggles behind the scenes, the Directorate is determined to lead the rather well-off civilization toward a great future.

### TERRAN FEDERATION

Terran Federation consists of numerous state systems with relatively similar ideals and histories. The Altair system is considered to be the most important of them, and it houses the Federal Parliament. The state systems enjoy quite a lot of freedom in their government, but in time of need they work efficiently together to protect the Federation.

### TERRAN UNION

After the long diaspora, the Terran Union settled in the Eta Cassiopeiae system. Despite occasional internal struggles, the Union has stood tall during hard times, often through strong diplomatic efforts and by staying carefully neutral. This may soon change, however, as the home system will not be able to provide for the whole civilization..

### TERRAN REPUBLIC

After having set their home in the Sirius system and doing their part in the Hegemony war, the people of the Terran Republic have built a democratically ruled society, enjoying a relatively stable and prosperous life.

## TERRAN CONGLOMERATE

Unlike the other Terran factions, the Conglomerate was originally fully backed by corporations eager to invest in the deep space colonies. This is still reflected in the society all the way from the Board, the highest governmental body of the Conglomerate, to the most mundane details of life in the Tau Ceti system. The Conglomerate is a financial powerhouse and one of the key players in the Galactic Center business.

## TERRAN ALLIANCE

The Alliance was a major force in the Terran-Hegemony War, after the already dissolving faction united against the common enemy. After the decisive victory in the Battle of Delta Pavonis (33.142) and driving the Hegemony fleet out of the sector, the Alliance made Delta Pavonis their home system. They have come a long way since then, but the old treaties are still in effect and the Alliance holds strong.

## ANCIENTS

There are no reliable documents regarding the seclusion of the Ancients. Most theories are based on the relics found in the systems believed to have been colonized by them. Some of the discoveries possess qualities previously unknown in the Galactic Library, but there is no solid theory on who or what the Ancients were, nor where they disappeared. Interestingly enough, folk tales of several different species allude to a similar, old evil. Recent messages from various sectors report of multiple contacts with something described as "Ships unlike any known design, with an unsettling feeling of Something hovering outside your field of vision" (Interceptor "Delirium of Disorder", Lambda Serpentis system, 43.393)

## GALACTIC CENTER

Established at the end of the Terran-Hegemony War (30.027–33.364), the awkwardly named Galactic Center has since become the contact hub of known spacefaring species. Evolved around the diplomatic Ships that negotiated the peace (Terran Interceptor "Shelter from the Storm" and Hegemony Dreadnought "Viewpoint Adjustment"), the conglomerate of Ships and habitats is now the home for billions of entities, housing both the Galactic Council and the Library of the Galactic Center. The Council has representatives from the major species known colloquially as the Seven. While the Galactic Center acknowledges all the lesser spacefaring species as equals, only the Seven have a formal position in the Council. The minor species do occasionally play their part in the Council power struggles.

Even in times of fledgling peace, when alliances shatter and hasty diplomatic treaties are made, the Galactic Center is considered a demilitarized zone and protected by heavy defenses.

## FREQUENTLY ASKED QUESTIONS

**Q: Where can I get more Resources?**

A: Place Influence Discs on sector hexes and use Colony Ships to move your Population Cubes on the Population Squares. Research the Advanced Technologies to be able to use the Advanced Population Squares. Build Orbitals to get more Population Squares. Collect Discovery Tiles.

**Q: What do I need Money for?**

A: You need Money to pay for the Upkeep of your civilization. The more actions you take and more sectors you control, the more you have to pay each round.

**Q: That's all?**

A: Yes. Well, you can also trade Money for other Resources, and vice versa.

**Q: I don't have enough Influence Discs to do everything I want to. What now?**

A: You can use the Influence action to return up to two discs from the sector hexes to your Influence Track. You can also research Advanced Robotics and Quantum Grid Technologies, which give you more discs. Finally, you often can deliberately bankrupt your civilization, by using more discs than you can pay for in the Upkeep Phase, and thus be required to return some of the discs from the sectors to your Influence Track.

**Q: The best Technologies are terribly expensive. How can I ever afford them?**

A: Having Technologies of the same category increases the discount you get when buying more. If you buy the Technologies in increasing price order, you get the maximum benefit of the discounts.

**Q: My precious Ships keep getting blown to pieces. How can I win more battles?**

A: You have an advantage if you get to shoot first, cannot be hit or can take some beating. Buy better Drives and Computers to increase your Initiative, and Missiles to attack before the close range combat. Buy Shields to render the opponent's Computers useless. Buy Hull parts to withstand more hits. Collect Discovery Tiles to get unique, powerful Ship Parts.

**Q: Aren't Interceptors too small to be of any use?**

A: Not really. For example, try upgrading them with a better energy source and they can pack quite a punch. They often work best when specialized somehow.

**Q: Are the Shields of any use if my opponents don't have Computers?**

A: No. Then again, if they don't have Computers, they most likely won't hit you anyway. Use that to your advantage.

**Q: What is the benefit of being the first player?**

A: You get the first pick on the researching Technologies and exploring empty areas. You also often get to be the first player in a contested hex, giving you the edge on Initiative ties.

**Q: If I have the Gluon Computer Technology, can I take Positron Computer Ship Parts?**

A: No. Each Ship Part (apart from the default ones, ie. Ion Cannon, Nuclear Drive, Nuclear Source, Hull and Electron Computer) requires its own Technology.

## MILITARY TECHNOLOGIES

**Neutron Bombs** You may destroy all the Population Cubes from the hex without rolling any dice.

**Starbase** You may Build Starbases.

**Plasma Cannon** You may Upgrade **PLASMA CANNON** Ship Parts.

**Phase Shield** You may Upgrade **PHASE SHIELD** Ship Parts.

**Advanced Mining** You may place Population Cubes in the advanced Materials squares with your Colony Ships.

**Tachyon Source** You may Upgrade **TACHYON SOURCE** Ship Parts.

**Plasma Missile** You may Upgrade **PLASMA MISSILE** Ship Parts.

**Gluon Computer** You may Upgrade **GLUON COMPUTER** Ship Parts.

## GRID TECHNOLOGIES

**Gauss Shield** You may Upgrade **GAUSS SHIELD** Ship Parts.

**Improved Hull** You may Upgrade **IMPROVED HULL** Ship Parts.

**Fusion Source** You may Upgrade **FUSION SOURCE** Ship Parts.

**Positron Computer** You may Upgrade **POSITRON COMPUTER** Ship Parts.

**Advanced Economy** You may place Population Cubes in the advanced Money squares with your Colony Ships.

**Tachyon Drive** You may Upgrade **TACHYON DRIVE** Ship Parts.

**Antimatter Cannon** You may Upgrade **ANTIMATTER CANNON** Ship Parts.

**Quantum Grid** You receive two additional Influence Discs, placed immediately on your Influence Track.

## NANO TECHNOLOGIES

**Nanorobots** You may Build one additional Ship or Structure.

**Fusion Drive** You may Upgrade **FUSION DRIVE** Ship Parts.

**Advanced Robotics** You receive one additional Influence Disc, placed immediately on your Influence Track.

**Orbital** You may Build Orbitals.

**Advanced Labs** You may place Population Cubes in the advanced Science squares with your Colony Ships.

**Monolith** You may Build Monoliths.

**Artifact Key** You must take 5 Resources of one type for each Artifact on your hexes.

**Wormhole Generator** You may Explore, Influence and Move through a hex edge that has a Wormhole on just one side.

## PREPARATIONS

Technology Tiles on Supply Board

Outer Sector hex stack

Players   
Tiles 12 14 16 18 20

Players   
Tiles 5 10 14 16 18

## ACTION PHASE

Starting from start player and going clockwise: take an Action or Pass

- EXP** Explore – place a hex next to a hex where you have a disc or a Ship, may discard
- INF** Influence – move Influence Discs and flip Colony Ships face up
- RES** Research – take a Technology, pay Science
- UPG** Upgrade – discard and take Ship Parts
- BUI** Build – build Ships or Structures in hexes where you have a disc, pay Materials
- MOV** Move – move Ships; may move same or different

At any time during action, you may use Colony Ships

Turn Summary Card dark side up when passing

After passing, you may only do Reactions ( **MOV**, **BUI** or **UPG** — weaker actions)

## COMBAT PHASE

Resolve battles in descending hex order

Score of 6 or more is a hit; a roll of 6 is always a hit, roll of 1 is always a miss

If a hex contains more than two sides, battles resolved in reversed entry order

GCDS, Ancients and player controlling the hex always battle last

Draw Reputation Tiles once per hex, keep one, placed on track

- 1 Tile for taking part in a battle (not if your last Ships retreated)
- 1 Tile for each opposing Interceptor, Starbase & Ancient destroyed
- 2 Tiles for each opposing Cruiser destroyed
- 3 Tiles for each opposing Dreadnought destroyed
- 3 Tiles for the Galactic Center Defense destroyed

## UPKEEP PHASE

May use remaining Colony Ships

Pay Upkeep and receive Production

## CLEANUP PHASE

Return Influence Discs from Action Track to Influence Track

Draw new Technology Tiles from bag

Players   
Tiles 4 6 7 8 9

## GAME END SCORING

Reputation Tiles  
1–4 VP per tile

Ambassador Tiles  
1 VP per tile

Hexes controlled  
1–4 VP per hex

Discovery Tiles  
2 VP per tile

Monoliths on controlled hexes  
3 VP per Monolith

Progress on Technology Track  
4 tiles on a track = 1 VP  
5 tiles = 2 VP  
6 tiles = 3 VP  
7 tiles = 5 VP

Traitor Card  
–2 VP

Species bonuses
