

Sequoia

Expansion

COMPONENTS

- ① **20 Tree Tokens:** for the 6th player.
- ② **5 Dice:** for the 6th player.
- ③ **4 Negative Value Tokens** 1x(-1pt, -2pt, -4pt, -5pt)

ADDITIONAL PLAYER

- * Use the yellow trees and dice to play with six players with the base game rules or with the expansions.

PARTNERSHIP VARIANT

- * Split into three teams, with two players on each team. All players still play simultaneously. When both partners have tokens in the same forest, their tokens are stacked together. During scoring, partners' tokens are counted together and points are awarded to the partnership as a whole and partners win as a team.

White and Green play as a team and have the most trees in this forest.

Give the -4pt token to Yellow and the -2pt token to Blue.

NEGATIVE VALUE EXPANSION

- 1 Before setup, *replace* one 3pt and one 5pt token with the -4pt and -5pt tokens.
- 2 *Randomly pair* the -1pt and -2pt with the -4pt and -5pt.
- 3 *Randomly deal* the second place tokens to forests with positive first place tokens.
- 4 When scoring forests with negative point values, give the worst token to the player with the fewest trees and the other token to the player with the second fewest trees. If there are ties, resolve them in the tiebreaker turns.
- 5 Tiebreaker turns cannot cause a player who was not originally in (or tied in) a negative token position to get a negative token.
